## Vaccine Policy

We understand you want what is best for your child and so do we. We know that you are bombarded by conflicting information on vaccine safety. We can help you get the information you need to make an informed decision.

- We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives.
- We firmly believe in the safety of our vaccines.
- We firmly believe, based on all the literature, evidence and current studies, that vaccines do not cause autism or other developmental disabilities.
- We firmly believe that vaccinating children and young adults may be the single most important health-promoting intervention we perform as health care providers, and that you can perform as parents.

We are not accepting new families who cannot agree to have their children fully vaccinated by age two.
